## Bolt Overview

Bolt is Europe's first mobility super-app that connects people to transportation, ride-share, food and grocery delivery - solving personal logistics reliable, affordable, safe and sustainable.

With its multi-disciplinary offering and sophisticated mobility services, Bolt has a broad range of solutions for its customers and partner network.

Bolt offer business products, fleets, driver, rider, hiring scooters/cars, food delivery or franchising. They also support their staff through dedicated business unit hubs and invest heavily in their partner and marketing efforts particularly their ambassador program.

# Bolt Sites

Bolt currently has 50+ LP's on Wix and growing! As a dynamic business with a broad ecosystem Bolt wanted their marketing department to be agile without needing to change too much of their embedded online solutions so they leveraged Wix's routing solution to redirect all marketing landing pages to their current domain.

This ensures they continue to capture all the SEO benefits for their domain, maintain brand consistency, create landing pages at speed (without reliance of devs) AND leverage our multilingual translation services simply by adopting our tech.
